Part # **01-1116** Polaris XP 1000, XP Turbo, and RZR 900 (2015+) (fits 2 & 4 seat models) Blue

Congratulations on your purchase of the DragonFire RacePace HeadAche Bars! As part of our RacePace modular cage system, these HeadAche Bars are a great addition to the OEM roll cage on any Polaris RZR XP 1000, XP Turbo, or RZR 900 (2015+) models. This easy bolt-on setup will provide added support, style and an aggressive look to your RZR. Be sure to check out the full line of DragonFire Accessories for your Polaris vehicle at your local authorized dealer or online at <http://www.DragonFireRacing.com>

**HeadAche Bars are specifically designed for vehicles with OEM roll cages. This product can be used with or without the RacePace Flying V & Dash Bar. HeadAche Bars can be used in conjunction with various roof/top options but mounting modifications may be required in order to clear HeadAche Bar mounting clamps.**

- Read and understand these instructions before installing product
- This product does not provide roll over protection
- Do not use product to hang on to while operating vehicle
- Replacement may be required in the event of a rollover accident
- Do not use product if there are any signs of damage
- Frequently inspect hardware to ensure mounting clamps are secure

### Tools Required

Floor Jack & Jack Stands

T40 Torx Bit

15mm Socket & Ratchet

3/16" Allen

### Disclaimer

Off road activities can be hazardous and could lead to injury, dismemberment, paralysis and death. No warranty of representation is made as to the products ability to protect the user from any injury or death. The user assumes that risk. The acceptance and /or use of this merchandise purchased from DragonFire by the customer hereby shall release DragonFire from any and all liability pertaining to the use of such merchandise.

**Step 1:** Place vehicle on a flat and level surface. Place gear selector in "Park" and remove keys from the ignition.

**Step 2:** Place jack stands under the vehicle frame, centered from front to rear. (Figure A)

**Step 3:** Remove the plastic factory visor and front cross tube. Retain all components and hardware. (Figure B)

**Step 4:** Remove the clamp halves from the HeadAche Bar. Retain all components and hardware.

**\*Step 5:** Place the HeadAche Bar in the top portion of the cage and reinstall rear clamp halves, leaving fasteners loose for adjustment in a later step. (Figure C)

**Step 6:** Install the front cross tube and plastic visor with factory hardware. Tighten the factory cage bolts to specifications in the Polaris service manual.

**Step 7:** Reinstall front clamp half and leave loose for adjustment. Verify HeadAche Bar is installed straight and tighten hardware on clamps to 7 ft-lb (84 in-lb).

**Step 8:** This completes the installation process. Time to ride and enjoy!

**\*Optional:** HeadAche Bar can work in conjunction with the DragonFire Flying V (sold separately). After Step 4, bolt Passenger side of Front Cross tube on and follow instructions supplied with Flying V.

**Pro Tip:** Periodically check all hardware and re-tighten if needed.
