**Pre-installation:** Lay out components and compare to list and images.

Tools Required
13mm Socket or Wrench
7/16" Socket or Wrench
Ratchet Wrench
No. 3 and 5 Allen Wrench
8 and 10mm Wrench

Part & Hardware List			
ITEM	QTY	TYPE	STEP USED
P1	2	Doors (driver & passenger side)	4
P2	4	Weather Strips	6

**NOTE: DOOR COMES WITH ALL HARDWARE LOOSE.**

**Step 1:** Place vehicle on a flat and level surface. Place gear selector in "Park" and remove keys from the ignition.

**Step 2:** Open door and remove door limit strap hardware from door leaving strap attached to vehicle(new strap is provided should you want to replace).

**Step 3:** With door shut, remove upper door hinge bolts from mount (Figure A). Remove door hinge from door, carefully, retaining nylon washer between door and hinge. While holding door up, carefully, open door from latch and lift door up off of lower door hinge.

**Step 4:** Place your new DragonFire Pursuit door(P1) onto lower door hinge, and reinstall door hinge and bolts. (Figure B)

**Note: Leave all door hardware loose as this will be tightened after fitment.**

**Step 5:** Latch is left loose so you can adjust as needed. Latch door shut and tighten upper hinge bolts until snug. Check that door shuts and opens without interference. Adjust and tighten. Once adjusted, torque hinge bolts to factory specifications. (Figure C)

**Note: If door seems to rattle, very carefully, twist the front lower corner of the door frame inward towards the vehicle so that the door frame contacts the door jam when latching closed. Re-adjust latch/hinge as needed.**

**Step 6:** Place weather strips(P2) between door tubing and door skin as desired. (Figure D)

**Step 7:** Check fitment and look of door skin then tighten all door skin hardware hand tight.

**Note: DO NOT overtighten as this could dimple/in-dent the door skin.**

**Step 8:** Reuse the factory door limit strap or the provided strap and install with provided screw (Figure E). Repeat all steps for other door.

**ProTip: Periodically check all hardware and re-tighten if needed.**
